PROFESSIONAL SUMMARY

Web developer with 3 years of hands-on experience building complete web applications with HTML, CSS, JavaScript and React, backed by a Diploma in Computer Science and a 16-week software engineering programme. Comfortable with databases, Linux servers and deployment, and eager to extend my skills into PHP and WordPress.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3, Tailwind CSS, responsive design

Backend: Node.js, Express.js, REST APIs, WebSockets (Socket.io)

Databases: SQL, Redis,mongo db

Tools & DevOps: Git, GitHub, Docker, Linux terminal workflows, server deployment

KEY PROJECTS

MWEA HUB: Rice & Grain E-Commerce Platform | *React · Next.js · Node.js · Express*

- Designed and built a full-stack e-commerce marketplace with a React/Next.js storefront, an Express backend and an admin dashboard.
- Implemented bulk-order management, including admin-controlled customer discounts and county-based transport costs, kept separate from retail stock.
- Added OTP-based account verification and role-based sessions with inactivity timeouts for admins and customers.

WiFi Billing System (ISP & Hotspot Management) | *Linux · MikroTik · Windows Server*

- Built a WiFi billing and subscriber management system for hotspot and ISP operators, installable on Linux servers, Windows servers and MikroTik-based networks.
- Connects billing logic to the network layer so customer access follows payment status, reducing manual administration for the operator.
- Combines software development with hands-on network configuration, Linux administration and deployment.

Phone Lock & Payments Diary System | *Full-stack · Payment tracking*

- Developed a system for tracking customer instalment payments on phones sold on credit, with a payment diary recording balances, payments and due dates.
- Supports device-lock control linked to payment status, giving sellers a practical way to manage credit risk.

Real-Time Multiplayer Game Platform | *Next.js · Node.js · Socket.io · Redis · TypeScript*

- Engineered low-latency real-time state synchronisation with Socket.io and Redis to stream fast-moving data to connected clients.
- Built a custom Node server alongside Next.js, with wallet and payment-integration modules, automated tests (Vitest) and Docker deployment.

PROFESSIONAL EXPERIENCE

Full-Stack Software Developer (Independent / Freelance) 2023 – Present

- Designed, built and deployed full-stack web applications end to end, from database and API design to responsive React/Next.js front-ends.
- Build responsive, user-friendly interfaces with React, Tailwind CSS and semantic HTML5/CSS3.
- Built and integrated REST APIs, SQL databases and third-party and payment services.
- Manage all projects with Git and GitHub using clean, version-controlled workflows.

EDUCATION & CERTIFICATIONS

Diploma in Computer Science, Nyeri National Polytechnic Graduated 2025

Certificate in Software Engineering, Power Learn Project 2025

- Intensive 16-week scholarship programme in full-stack web technologies, clean coding principles and collaborative hackathons.

CORE COMPETENCIES

System architecture and data flow | API integration | Rapid problem solving | Network infrastructure and Linux | Continuous learning
